

Uninsulated covers

For pergolas or carports

QUICK COVER - EASY COVER - OMNI COVER

The Quick Cover provides perfect shelter in most situations. The Easy Cover offers limitless technical and aesthetic possibilities. In addition, there is also the curved design of the Omni Cover, which is very popular as a carport system.

QUICK COVER

QUICK COVER

The quick solution

Quick Cover is the best roofing system and offers a good price-quality ratio, which it achieves through the optimisation of the used materials and finishing without having any negative effects on design and resistance. The Quick Cover system is intended to provide a quickly and properly constructed structure for the most common situations at a very competitive price.

The Quick Cover system has a fixed inclination of 7.5° and can be finished with a rounded or with a gutter in soft or characterful look.

EASY COVER

Makes everything possible

The Easy Cover roofing system offers you a wide range of options, including a variable inclination angle. All currently used fillings can be used as glazing for the cover: laminated glass or polycarbonate, up to 32 mm.

Extra attention has been paid to stiffness, which makes large spans possible, and the system is highly compatible with the S20 glass frame without the use of an additional intermediate post. Furthermore, different raised gutter profiles can be used to obtain the desired style.

OMNI COVER

The ideal protection against rain

A complete system of extremely slender, curved aluminium support profiles which are suitable for the construction of carports, skylights and awnings. The well-thought-out design results in an ideal combination of elegance, high light transmittance and structural strength.

Thanks to the low weight of the materials used (aluminium and polycarbonate), this structure can be applied to any solid surface without special provisions.

The round support poles also have a water drainage function. Depending on the situation, both the width (multiple modules next to each other) and the depth of the system can be expanded.

PROPERTIES OF UNINSULATED COVERS

	QUICK COVER	EASY COVER	OMNI COVER
Budget	***	**	**
Inclination	7,5°	8° to 20°	Arch
Width	Up to 3 m	Up to 5.5 m	Up to 4 m
Glass	Yes, such as 44.2 safety glass	Yes, such as 44.2 safety glass	-
Polycarbonate	Up to 16 mm	Up to 32 mm	Up to 10 mm
Spotlights	Possible in girders	Possible in girders and gutters	-
Roof girders	92 mm	112 mm	28 mm curved girders
Drainage	Invisible built-in drainage		
Gutter	Characterful or soft look	Timeless, characterful or soft look	Timeless look
